Client filter and customized diagnostic templates now available with the Troubleshooting Memos

To assist you in identifying clients that could be affected by the described problems, a downloadable client filter and customized diagnostic template is now associated with most *Troubleshooting Memos*. These templates allow you to display a diagnostic in the returns that have tax situations that were the subject of a *Troubleshooting Memo* and provide access to a list of clients affected by the problems described.

Installing the client filter and diagnostic template

To find the predefined folder for customized client filters or diagnostics, proceed as follows:

1. Launch *Taxprep*.
2. On the **Tools** menu, click **Options and Settings**.
3. Under **Options**, click **File Locations**.
4. Verify the predefined location for the filters and diagnostics. After the installation, the default location is usually the following: **My Documents\CCH\T1 Taxprep 2015\Filter and Diagnostics**.
5. Copy the downloaded file to this location.
The client filter will be available in the Client Manager, while the diagnostic will display in the relevant returns.

Note: The table below lists all of the client filter templates and diagnostics, which allows you to download them separately, depending on the troubleshooting memos and FAQs that relate to you. To download all templates in a single operation, click the **Download all templates** button, then copy all zipped files into the folder **My Documents\CCH\T1 Taxprep 2015\Filter and Diagnostics**.

T1-ADJ - Incorrect amount updated to line 459 when the adjustment request is prepared automatically

[Download the client filter and diagnostic template](#)

Problem:

When a Form T1-ADJ is prepared automatically to correct the amount claimed for the children’s fitness tax credit (line 459 of the federal tax return), the amount updated to line 459 of Form T1-ADJ is not the amount of the credit, but the amount of fees paid, which is incorrect.

Canada Revenue Agency / Agence du revenu du Canada

T1 ADJUSTMENT REQUEST

- Use this form to request an adjustment (a reassessment) to an individual income tax return.
- See Help (F1) for information on how to complete it.
- Send the completed form to the tax centre as indicated on your notice of assessment for the year being adjusted.

Steps to prepare an automatic T1-ADJ form:

Note: It is recommended to create a copy of the tax return **before** making the adjustments.

1) Prepare an automatic T1-ADJ form.

Taxpayer

Spouse

(Complete a separate form for each year)

C Adjustment details

List the details of your requested change below. If you have received an assessment or reassessment notice with an amount that is different from the amount on the return you submitted, show the amount stated on the notice as the previous amount. You must provide supporting documentation for the entire revised amount. This may include receipts, schedules, or other relevant documents. **Your request may be delayed if you do not provide all required information with this form.**

Applicable receipts or other documentation should be attached to this form to support the request for adjustment.

| Line number from return or schedule | Name of line from return or schedule | Previous amount | + - | Amount of change | Revised amount |
|-------------------------------------|--------------------------------------|-----------------|--------|------------------|----------------|
| | | 0 00 | + | 0 00 | 0 00 |
| 459 | Children's fitness tax credit | 500 00 | + | 500 00 | 1,000 00 |

Other details or explanations (attach an extra sheet if required)

Please give a detailed description of the adjustment request (press Ctrl+Enter to insert a line break)

Solution:

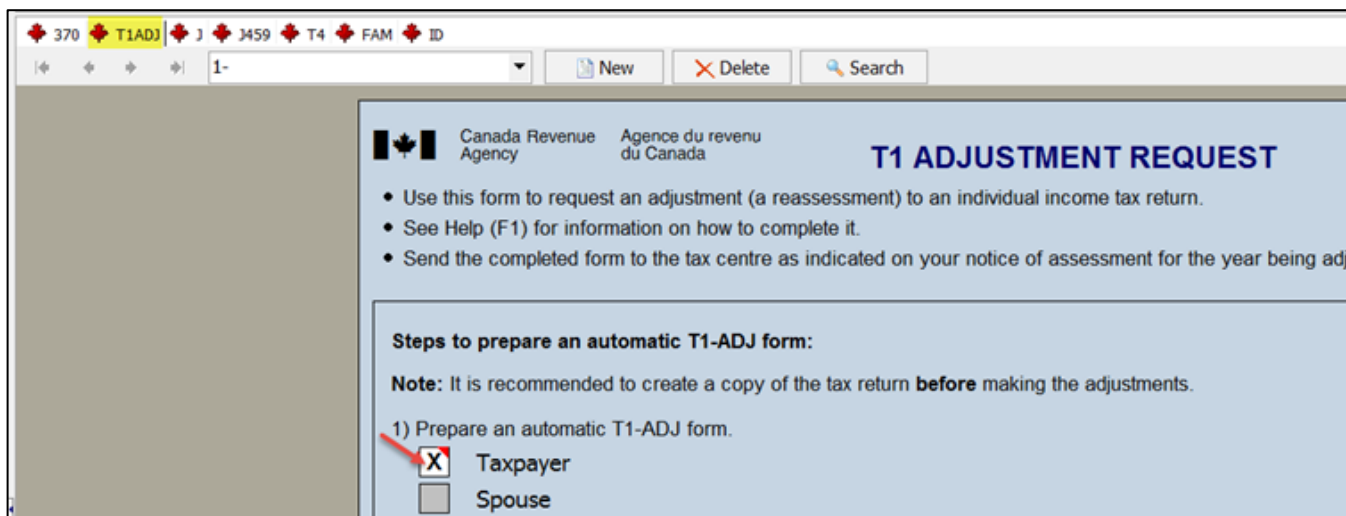

There are two possible solutions:

If you want Form T1-ADJ to be prepared automatically (for example, in the case where several lines must be adjusted in addition to line 459), proceed as follows once Form T1-ADJ is printed: cross off number “459” and the title “Children’s fitness tax credit,” and manually write number “458” as well as the title “Eligible fees.”

If you prefer completing Form T1-ADJ manually, proceed as follows:

1. Clear the appropriate box on line *Prepare an automatic T1-ADJ form*.

2. Answer “Yes” to the question you are asked.

- In Section C, "Adjustment details," enter "458" in the column **Line number from return or schedule** and "Eligible fees" in the column **Name of line from return or schedule**, and enter the previous amount as well as the revised amount.

Line 318 - Disability amount transferred from a dependant not calculated

[Download the client filter and diagnostic template](#)

Problem:

The disability amount transferred from a dependant is not claimed on line 318 of the taxpayer's Schedule 1 and/or the spouse's Schedule 1 when all of the following conditions are met:

- the taxpayer's and the spouse's returns were not coupled in 2014;
- more than one dependant was identified in the taxpayer's or the spouse's FAM form in 2014, and at least one of these dependants was eligible for the disability amount;
- after rolling forward the client file to the 2015 taxation year, the returns of the taxpayer and the spouse have been coupled.

Solution:

To solve this problem, you have to follow one the procedures proposed below for each dependant eligible for the disability amount, depending on whether the return of the dependant is coupled or not.

If the return of the dependant is coupled

- In the FAM form, select the copy of the dependant who is eligible for the disability amount.
- Clear the box **Add a dependant's return**.

Family Profile

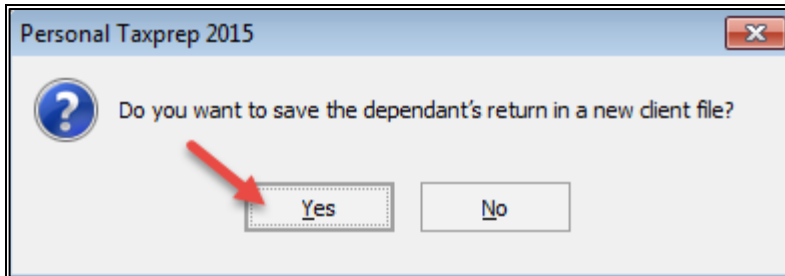

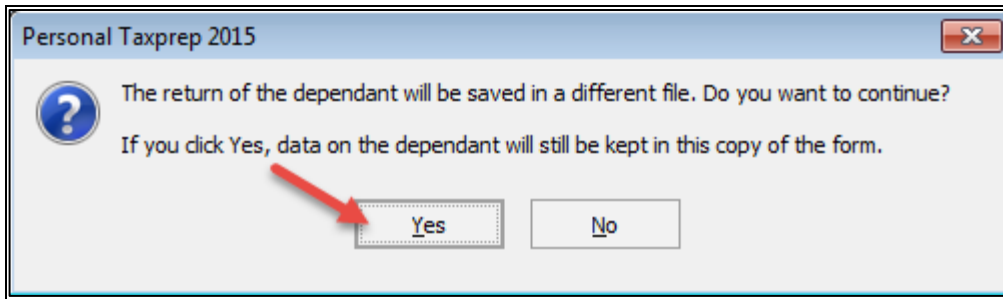

Family Data Connection

Add a dependant's return

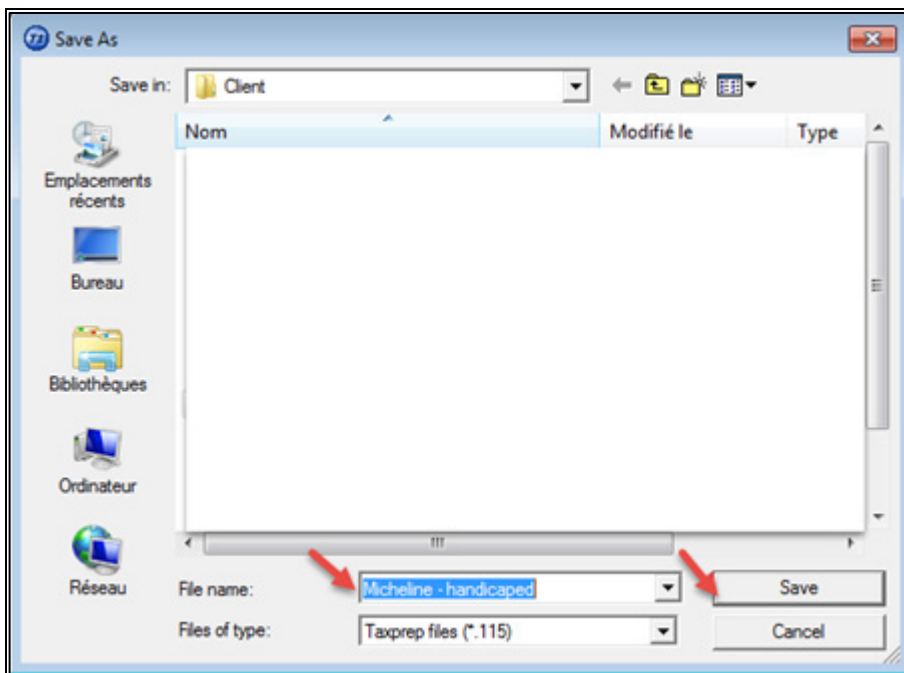

Québec return

Perform the optimization calculation between the return of the parent and that of the dependant (see Note)

3- Answer “Yes” to the first question you are asked, and “Yes” to the second question.

You must then enter a file name and save the client file.

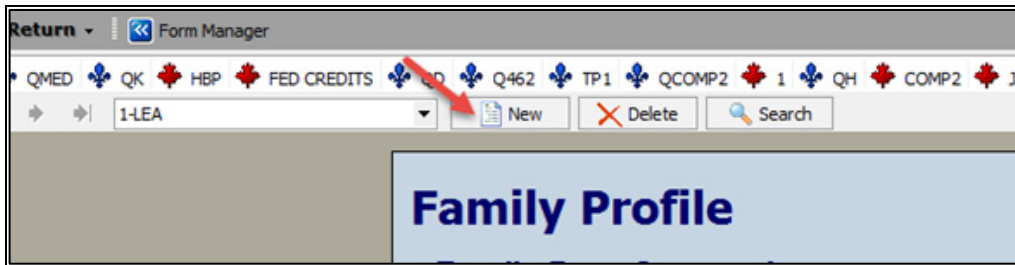

4- Close the return that you just saved before you continue. To do so, selected the saved file in the Client drop-down list and choose **Close Tax Return** (Ctrl+W) in the **File** menu.

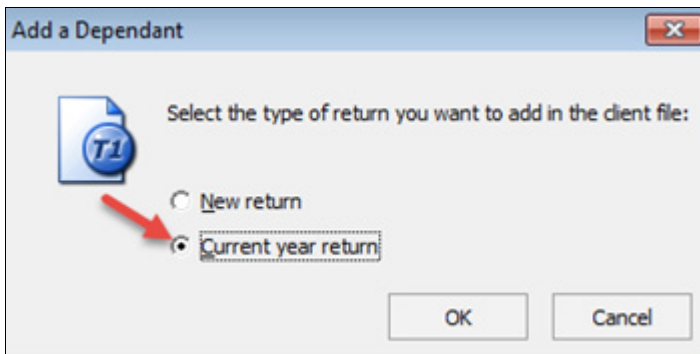

5- Go back to the FAM form of the client file affected by this problem and delete the copy of the dependant eligible for the disability amount.

6- Still in the FAM form, create a new copy.

7- Select the box Add a dependant's return and select Current year return.

8- Open the client file that you saved at step 3.

9- Answer “Yes” to the question you are asked.

10- Verify the information shown on the *Family Profile* form of the dependant whose return you added at step 7 to make sure that his or her profile is complete.

If the return of the dependant is not coupled

1- Create a new copy in the FAM form.

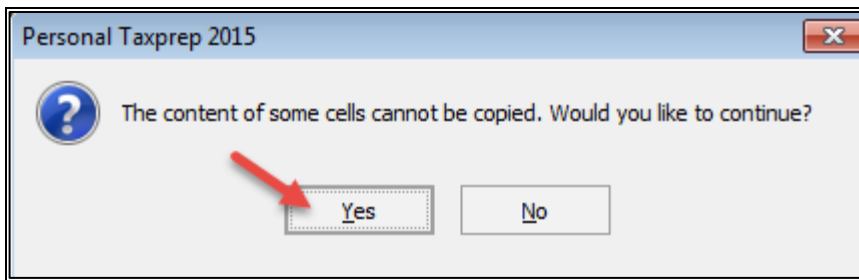

2- Select the copy of the dependant who is eligible for the disability amount.

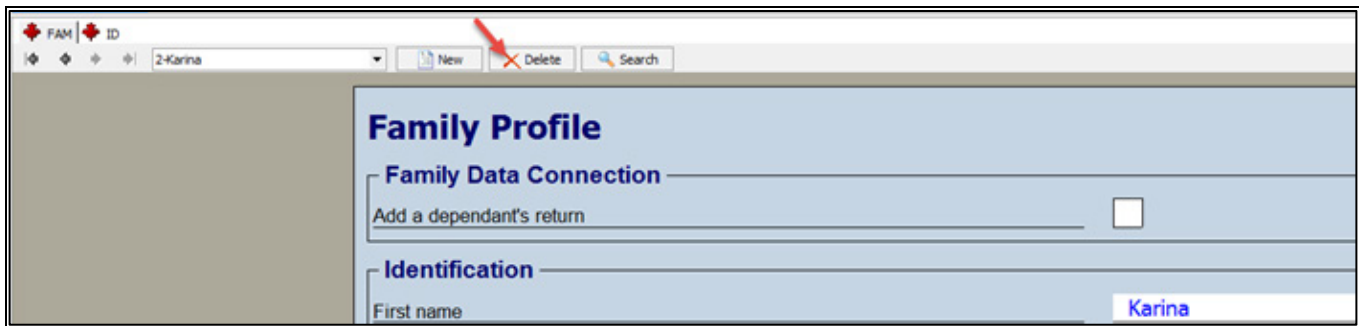

3- In the **Edit** menu, click **Select Input Cells** (or press Ctrl+F7). Then, select **Copy** in this menu (or press Ctrl+C).

4- Access the new copy created and choose **Paste Form** in the **Edit** menu.

5- Answer “Yes” to the question you are asked.

6- Delete the dependant’s copy resulting from the roll forward (the one you had selected at step 2).

T5013 slip with both a partner code “5” and a professional income in box 120 may create a problem in the Québec income tax return (TP1)

NOTE: This troubleshooting applies when all of the following conditions are met:

- the TP1 module (Québec) is installed;
- the taxpayer covered by the return is in a multiple jurisdiction situation;
- the T5013 slip includes several boxes 120, one of which is for Québec allocation; and
- the T5013 includes a partner code “5” in box 002.

Download the client filter and diagnostic template

Problem:

When a T5013 slip has a partner code “5” in box 002 and professional income is shown in several boxes 120, including one for Québec allocation, the Québec allocation appears to be incorrect on Form TP-22/TP-25, *Detail of Net Income from Businesses Carried on in Québec* (Jump Code: **Q22 Q25 D**).

Depending on the order the data has been entered on the T5013 data entry screen, it is possible that the income allocated to the TP1 return for this specific T5013 slip will either be missing or duplicated on Form TP-22/TP-25 (Jump Code: **Q22 Q25 D**) when the partner code on the T5013 slip is “5” and income is shown in boxes 120.

| Total allocated to Québec (amount carried to line 1 of Form TP-22 or TP-25) | | | | 0 00 |

Solution:

In order to rectify both situations, simply change the partner code from “5” to “2” on the T5013 data entry screen.

If you have entered a code “5” in the T5013 slip and the income is already correctly allocated on Form TP-22/TP-25 (Jump Code: Q22 Q25 D), you are not required to change the code.

Note that partner codes “2” or “5” have the same purpose in *Personal Taxprep* when professional income is reported in boxes 120 of the T5013 slips. Furthermore, those codes are not included in the federal and Québec income tax returns that you file.

Schedule Q and amount withdrawn from a RRIF/RPP/PRPP that is greater than the reduced 2015 minimum amount and that is re-contributed to a RRIF/RPP/PRPP before March 1, 2016

[Download the client filter and diagnostic template](#)

Problem:

If an amount withdrawn from a RRIF/RPP/PRPP is greater than the reduced 2015 minimum amount and is re-contributed to a RRIF/RPP/PRPP before March 1, 2016, it can be deducted on line 232 of the federal income tax return and on line 250, point 04, of the Québec income tax return.

If a taxpayer in this situation wants to split pension income with his or her spouse, the amount eligible for the split corresponds to the amount withdrawn less the amount re-contributed. The amount that can be split is correctly updated to Form T1032, which is used to calculate the income split in the federal income tax return. However, the amount that can be split that is updated to Schedule Q, which is used to calculate the income split in the Québec income tax return, does not take into account the re-contributed amount deducted at point 04 of line 250. Where applicable, the Québec amount that can be split is overvalued.

Example:

In 2015, John withdrew \$25,000 from his RRIF, which represents the minimum amount that can be withdrawn under former rules relating to the calculation of the required minimum withdrawal. In accordance with the new rules, the new minimum withdrawal amount is \$20,000. John decided to contribute the excess amount of \$5,000 in his RRIF. The amount eligible for the pension income split is therefore \$20,000.

Federal income tax return, Form T1032:

Step 2 – Calculation of the maximum split-pension amount

To calculate the amount of eligible pension income for the purpose of this election, you (the pensioner) must complete the chart for line 314 on the *Federal Worksheet* which you will find in the forms book.

Enter on this line, the **total** amount from **line A** of the chart for line 314 of your *Federal Worksheet*. **6802** 20,000|00 A

If you were 65 years of age or older on December 31, 2015 (or on the date of death) and received amounts in the form of life annuity payments from a retirement compensation arrangement, complete lines 1 and 2. Otherwise, enter "0" on line B, and continue on line C.

Enter the amount from box 17 of your T4A-RCA slips. **6806** 0|00 1
 \$98,661 minus amount from line A 78,661|00 2

Enter the **lesser** of lines 1 and 2. 0|00 B
 Add lines A and B. 20,000|00 C

If your marital status changed during the tax year, calculate the eligible pension income for the period that you were married or living common-law by completing the calculation for line D below. Otherwise, enter the amount from line C on line E.

Number of months you were married or living common-law **6803** 0 * X Amount from line C 20,000|00 0|00 D
 Number of months in the tax year 12

Enter the amount from line D if it applies. Otherwise, enter the amount from line C. 20,000|00 E
 X 50.00 %

Multiply the amount on line E by 50%. **Maximum split-pension amount** 10,000|00 F

* For a deceased pensioner, use the number of months up to and including the month of death.

Québec income tax return, Schedule Q:

A. Retirement income transferred to your spouse

Amount from line 122 of your return A 25,000|00
 Other amounts from a retirement compensation arrangement (included on line 154) B 0|00
 \$98,661 minus amount from line A C 73,661|00

Enter the **lesser** of lines B and C. D 0|00
 Total of eligible retirement income. Add lines A and B. 10 25,000|00

Amount from line 10 used to purchase an annuity or transferred to an RRSP, a RRIF or a PRPP/VRSP (included in the amount on line 250 (point 4)) 12 0|00
 Deduction claimed on line 250 (point 6) for a refund of unused PRPP/VRSP contributions included in your income on line 10 above + 13 0|00
 Deduction claimed on line 293 of your return for the amount on line 10 + 14 0|00
 Deduction claimed on line 297 (point 12) of your return for the amount on line 10 + 16 0|00
 Add lines 12 through 16. = 18 0|00
 Subtract line 18 from line 10. = 20 25,000|00

Retirement income you are transferring to your spouse (**maximum** 50% of the amount on line 20). Carry this amount to line 245 of your return. 22 0|00
 Your spouse must enter the same amount on line 123 of his or her return.

Solution:

To correct the amount that can be split in Schedule Q, add, on line 12 of Schedule Q, the amount re-contributed to a RRIF/RPP/PRPP, using an override, then recalculate the split pension amount using the **Calculate** button in Form T1032.

In the case of John, he must therefore enter an amount of \$5,000 on line 12 of Schedule Q, using an override, in order for the amount used for the split to be \$20,000.

A. Retirement income transferred to your spouse

| | | | |
|--|------|-----------|-----------|
| Amount from line 122 of your return | | A | 25,000 00 |
| Other amounts from a retirement compensation arrangement (included on line 154) | B | 0 00 | |
| \$98,661 minus amount from line A | C | 73,661 00 | |
| Enter the lesser of lines B and C. | | | |
| Total of eligible retirement income. Add lines A and B. | | D | 0 00 |
| Amount from line 10 used to purchase an annuity or transferred to an RRSP, a RRIF or a PRPP/VRSP (included in the amount on line 250 (point 4)) | 12 | 5,000 00 | |
| Deduction claimed on line 250 (point 6) for a refund of unused PRPP/VRSP contributions included in your income on line 10 above | + 13 | 0 00 | |
| Deduction claimed on line 293 of your return for the amount on line 10 | + 14 | 0 00 | |
| Deduction claimed on line 297 (point 12) of your return for the amount on line 10 | + 16 | 0 00 | |
| Add lines 12 through 16. | = 18 | 5,000 00 | |
| Subtract line 18 from line 10. | = 20 | 20,000 00 | |
| Retirement income you are transferring to your spouse (maximum 50% of the amount on line 20). Carry this amount to line 245 of your return. Your spouse must enter the same amount on line 123 of his or her return. | | 22 | 0 00 |

Because the deduction for an amount withdrawn from a RRIF/RPP/PRPP that is greater than the reduced 2015 minimum amount and that is re-contributed to a RRIF/RPP/PRPP before March 1, 2016, is a temporary deduction only applicable to the 2015 taxation year, this problem will no longer be present in *Personal Taxprep* 2015 v.4.2.

RL-10 slip and T5006 slip - Unused balance of the federal tax credit for provincial labour-sponsored funds carried forward to 2016 calculated at a 5% rate instead of a 15% rate

[Download the client filter and diagnostic template](#)

Problem:

In the RL-10 slip and the T5006 slip, a section has been added to calculate the credit balance of the federal labour-sponsored funds. In this new section, the closing balance of this credit, which will be carried forward to 2016, is calculated with a 5% rate. However, in accordance with the measures announced in the latest federal budget, the rate of the tax credit for a provincial labour-sponsored funds will be 15% instead for the 2016 taxation year. As for the federal labour-sponsored funds, it will remain at 5% for 2016.

Example:

A \$5,000 investment is made in a provincial labour-sponsored funds in the first 60 days of 2016, and no credit is deducted on line 414 of Schedule 1.

In this situation, the program displays the following results in the RL-10 slip or the T5006 slip:

| Carryforward of the federal credit (Schedule 1, lines 413 and 414) | | | | |
|--|-----------------------------------|-------------------|--------------|-----------------|
| | 1 | 2 | 3 | 4 |
| | Balance carried forward from 2014 | Investment amount | Credit (10%) | Closing balance |
| Federal | 0 00 | 0 00 | 0 00 | 250 00 |

For the 2015 taxation year, the federal labour-sponsored funds tax credit that can be claimed on line 414 of Schedule 1 decreases from 15% to 10%. The investments made in the first 60 days of 2015 that have not been deducted at a 15% rate in the 2014 tax return can be deducted in the 2015 tax return, but at a 10% rate.

- Unused tax credit for investments made in the first 60 days of 2015 (calculated at a 15% rate)
- Amount of investments on which the tax credit carried forward from 2014 had been calculated (at a 15% rate)
- Tax credit calculated on the amount in column 2 at a 10% rate and deductible on line 414 of the 2015 Schedule 1
- Unused tax credit carried forward to 2016. A credit that has not been deducted in the 2015 tax return (at a 10% rate) can be deducted in the 2016 tax return, but at a 5% rate.

The program calculates a \$250 credit to carry forward (i.e. 5% of \$5,000), while in fact, the amount of the credit carried forward that could be deducted in the 2016 tax return would be \$750 (i.e. 15% of \$5,000).

Solution:

There are two possible solutions:

The first solution is not to make any modifications in the RL-10 slip or the T5006 slip. When rolling forward the client file with version 2016 of *Personal Taxprep*, the balance will be modified to reflect the 15% rate.

In this example, when rolling forward the client file with version 2016 of *Personal Taxprep*, the balance carried forward from 2015 would be \$750.

The second solution is to override the closing balance to indicate the carried forward credit calculated with the 15% rate. If you perform an override in the RL-10 slip or the T5006 slip, following the roll forward of the client file with version 2016 of *Personal Taxprep*, the opening balance will correspond to the amount that had been overridden in the RL-10 slip or the T5006 slip of the 2015 version.

By overriding the federal labour-sponsored funds amount carried forward, you will ensure that the balance to carry forward displayed in Forms ACCT SUM, CFSUM and QC CFSUM is correct.

In Form T5006, the closing balance of the federal funds should not be modified, because the 5% rate applies to the federal labour funds for the 2016 taxation year.

This problem will be corrected in *Personal Taxprep* 2016 v.1.0.

TP1 - Line 424 - Incorrect calculation of the tax credit for a labour-sponsored fund in certain situations

[Download the client filter and diagnostic template](#)

Problem:

The amount of the tax credit for a labour-sponsored fund is incorrectly calculated on line 424 of the TP1 return when the taxpayer received one or more RL-10 slips and the following conditions are met:

- an amount is shown in box G1, *Amounts paid before June 1*;
- an amount is indicated in either box A, *Amounts paid during the period to purchase shares in the fund*, or box G2, *Amounts paid after May 31*, and/or an unused balance of the tax credit for a labour-sponsored fund has been carried forward from 2014;
- the total of boxes G1, G2, A, and the investment amount corresponding to the unused credit balance for 2014 exceeds \$5,000.

| Tax credit with respect to a labour-sponsored fund | | |
|--|------------------|---|
| Eligible for a labour-sponsored fund tax credit? | | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No |
| | Total investment | Tax credits |
| RL-10 slip, box A minus box C | 1,000 00 | 150 00 |
| RL-10 slip, box G1 minus box I | 1,500 00 | 375 00 |
| RL-10 slip, box G2 minus box I | 2,500 00 | 500 00 |
| Prior years | 100 00 | 15 00 |
| Total tax credits entered on RL-10 slip | | 1,040 00 |

In this situation, the credit calculated on line 424 will be less than the maximum amount that can be claimed and, as a result, a balance will be carried forward to 2016.

Solution:

This problem has been corrected in *Personal Taxprep* 2015 v.4.0.

If the tax return **has not yet been filed**, opening and saving the client file with version 4.0 will correct the amount on line 424 of the TP1 return.

If the tax return has been filed with a version prior to version 4.0 and you want to modify the credit amount, file Form TP-1.R, *Request for an Adjustment to an Income Tax Return* (Jump Code: QTP1R). If the return has been filed via NetFile Québec with a version prior to version 4.0, you can verify the amount that has been claimed on line 424 of the TP1 return by reviewing Form QEFILE SUM.

| TP1 Return – Income tax and contributions payable | | | |

| 401 | 4,620 80 | 415 | 0 00 |
| 401A | 0 | 422 | 0 00 |

| | | 453 | 0 00 |
| | | 454 | 0 00 |
| | | 457 | 0 00 |
| | | 458 | 0 00 |

If you do not want to modify a tax return that has already been filed with a version prior to version 4.0, it is important not to open and save the client file in version 4.0.

Newfoundland and Labrador HST credit

Download the client filter and diagnostic template

Problem:

In its 2016-2017 Budget, Newfoundland and Labrador announced the replacement of the sales tax credit by a new benefit, the Newfoundland and Labrador income supplement. This measure applies commencing in the 2016 taxation year, and the Newfoundland and Labrador income supplement will be paid at the same time as the low income seniors' benefit.

The most recent budget also sets forth the increase in the base amount in accordance with the low income seniors' benefit.

However, in all versions of *Personal Taxprep* 2015, the Newfoundland and Labrador sales tax credit is calculated, and the low income seniors' benefit takes the old amounts and rates into account.

Solution:

Cancel the calculation of the sales tax credit as well as the calculation of the low income seniors' benefit, because we do not yet have all of the required information to correctly calculate this benefit.

For more information on the new income supplement as well as the low income seniors' benefit, consult the 2016-2017 Newfoundland and Labrador Budget by clicking the following link:

<http://www.releases.gov.nl.ca/releases/2016/fin/0414n03.aspx>.

To cancel the sales tax credit and the low income seniors' benefit, override line 14 with "0," at the bottom of Form GSTC, *Goods and Services Tax Credit* (Jump Code: GSTC).

TaxprepConnect Download - Possible duplication of the downloaded RL slips when the number of downloaded RL slips of the same type is greater than 9

Download the client filter and diagnostic template

Problem:

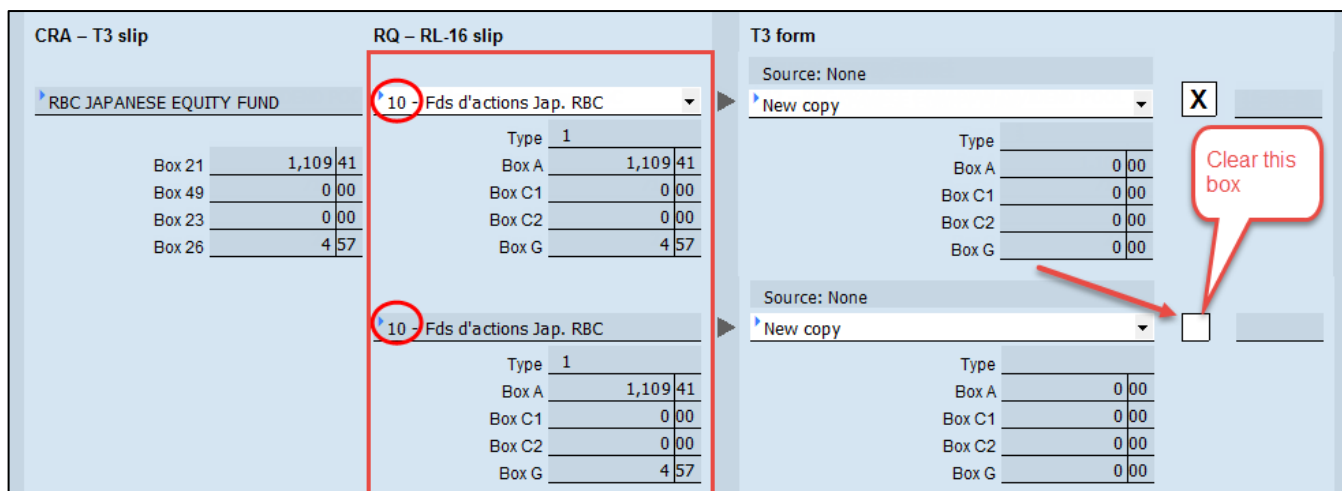

When the number of RL slips of the same type downloaded from *Revenu Québec* is greater than 9 and the RL slips of this type are manually linked by the preparer to slips downloaded from the CRA, those RL slips are duplicated in the *TaxprepConnect Download* form. Because the program selects by default all of the slips for transfer to the return, certain amounts might be duplicated in the return.

The screenshot shows the TaxprepConnect interface with three main sections:

- CRA - T3 slip:** Shows a table for 'RBC JAPANESE EQUITY FUND' with values for Box 21 (1,109 41), Box 49 (0 00), Box 23 (0 00), and Box 26 (4 57).
- RQ - RL-16 slip:** Shows two identical entries for '10 - Fds d'actions Jap. RBC'. Each entry has a 'Type 1' and a table with values for Box A (1,109 41), Box C1 (0 00), Box C2 (0 00), and Box G (4 57). A red box highlights these two entries, and a callout bubble says 'Duplicate RL slips'.
- T3 form:** Shows two identical forms, each with a 'Source: None' dropdown, a 'New copy' dropdown, and a table with values for Type, Box A (0 00), Box C1 (0 00), Box C2 (0 00), and Box G (0 00). Red arrows point to a red 'X' in a box next to each form, indicating they are both selected for transfer.

Solution:

To prevent data to be duplicated during the transfer to the return, make sure to clear the transfer boxes for the duplicated RL slip, as depicted below.

EFILE - Result code 183

[Download the client filter and diagnostic templates](#)

Problem:

I transmitted a T1 return with *Personal Taxprep* 2015 v.2.0 and received a “Not transmitted” message with no description. My return is still eligible and there is no confirmation number in the client file.

When I contacted the CRA EFILE helpdesk, they confirmed that the return had been accepted with a Result code 183.

Solution:

You can now EFILE a return in which a disability amount is claimed even if Form T2201, *Disability Tax Credit Certificate* has not yet been received by the CRA or if a new Form T2201 is required.

In those situations, the Result code 183 is returned by the CRA and the return is accepted, but the following CRA message should have been displayed in *Taxprep*:

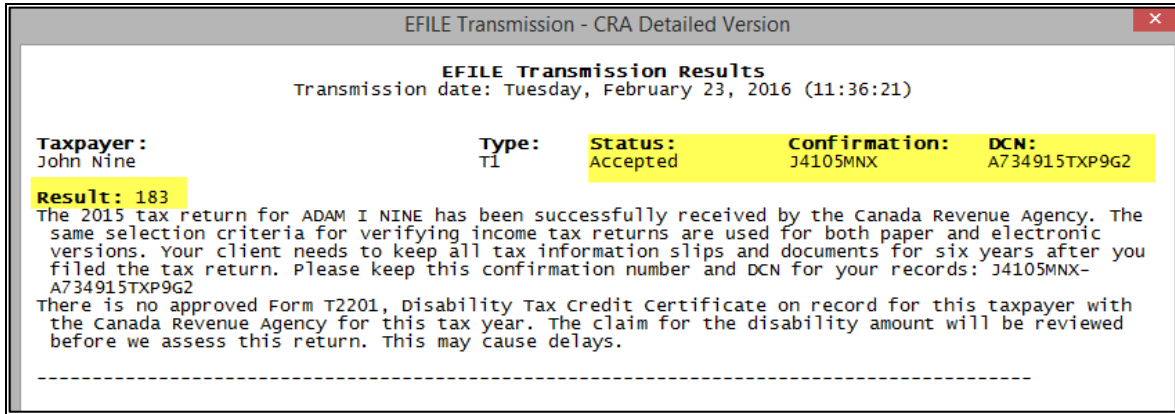

The <tax year> for <taxpayer's name> has been successfully received by the Canada Revenue Agency. The same selection criteria for verifying income tax returns are used for both paper and electronic versions. Your client needs to keep all tax information slips and documents for six years after you filed the tax return. Please keep this confirmation number and DCN for your records: ##### - #####

There is no approved Form T2201, Disability Tax Credit Certificate on record for this taxpayer with the Canada Revenue Agency for this tax year. The claim for the disability amount will be reviewed before we assess this return. This may cause delays.

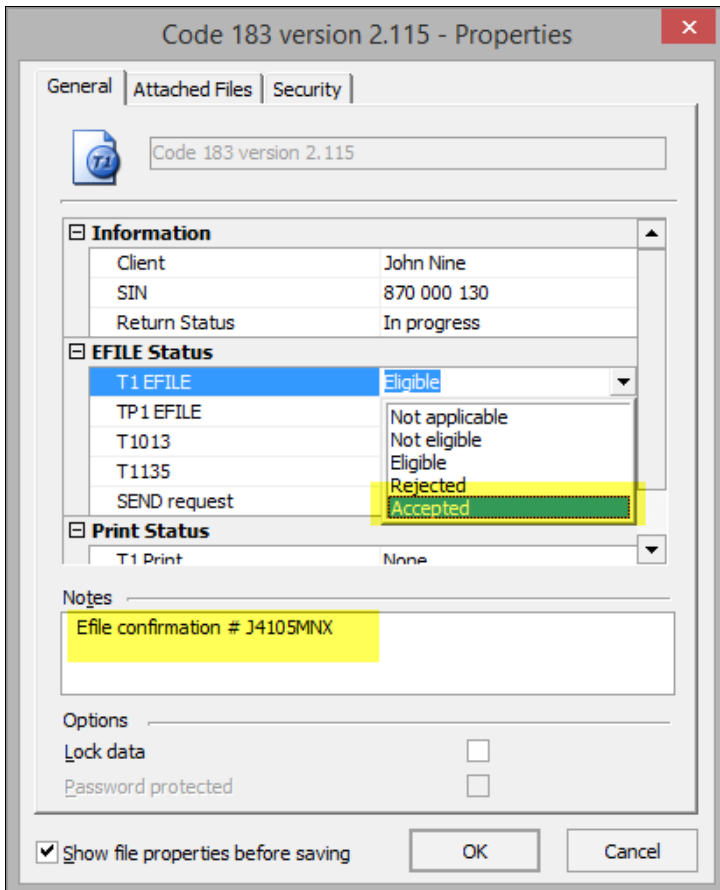

Note that for technical reasons, this specific message cannot be displayed in the **EFILE Transmission Results** dialog box and the EFILE status cannot be updated correctly in *Personal Taxprep* 2015 v.2.0.

However, you can view the message and your confirmation number if you click the **CRA Detailed version** button located at the bottom left-hand corner of the **EFILE transmission Result** dialog box.

If you want, you can also contact the CRA EFILE helpdesk to receive the confirmation number over the phone.

Once you have this information, you can manually change the EFILE status from “Eligible” to “Accepted” and enter the confirmation number in the “Notes” field of the **Properties** dialog box (F11).

Alternatively, you can also enter the confirmation number as an “attached note” in the confirmation number cell in Form EFILE INFO (Jump Code: **EFILE INFO**).

T2038 - The investment tax credit balance carried forward is incorrect in certain situations when the credit has been claimed or refunded in 2014

[Download the client filter and diagnostic template](#)

Problem:

An investment tax credit balance carried forward can be rolled forward by error into Form T2038 when the credit has been claimed or refunded in 2014. This problem occurs when, in 2014, an investment tax credit has been calculated with amounts that had been overridden on lines 6712, 6715, 6714 or 6723 in Part A of Form T2038 of 2014.

This problem affects files rolled forward from *Taxprep*, *Cantax*, *Profile* and *DT Max* 2014.

Solution:

In both sections affected by the problem, modify the amount rolled forward on the line *Other - after March 18, 2007 but before 2014* in order to include only reserves for dispositions after March 18, 2007 but before 2014. Then, enter the amount of reserves for dispositions in 2014 on the line *Other - in 2014*.

This problem will be corrected in *Personal Taxprep* 2015 v.4.1.

Troubleshooting T12015-004**Line 319 - Carrying forward 2014 interest on student loans - Rolling forward a 2014 DT Max file**

[Download the client filter and diagnostic template](#)

Problem:

As a result of the roll forward of a 2014 DT Max file, the amount of interest on student loans for 2014 to carry forward to the following years is incorrect when an amount has been claimed on line 323, *Your tuition, education and textbook amounts (attach Schedule 11)*, of the taxpayer's Schedule 1 for 2014.

When rolling forward the DT Max file in *Personal Taxprep*, the amount that had been claimed on line 323 of Schedule 1 in 2014 is added to the 2014 amounts carried forward to Form Schedule 1 Line 319, *Interest Paid on Student Loan* (Jump Code: 319), which is incorrect.

Example 1:

A credit of \$1,500.00 has been claimed on line 323 of Schedule 1 for 2014, and there is no balance of interest on student loans for 2014 to carry forward to 2015.

As a result of the roll forward to *Personal Taxprep*, an amount of \$1,500.00 is indicated as the balance of interest on student loans for 2014, which is incorrect.

Example 2:

A credit of \$1,500.00 has been claimed on line 323 of Schedule 1 for 2014, and there is a \$600 balance of interest on student loans for 2014 to carry forward to 2015.

As a result of the roll forward to *Personal Taxprep*, an amount of \$2,100.00 is indicated as the balance of interest on student loans for 2014, which is incorrect. This error results from the fact that the program currently adds the amount of \$1,500 to the amount of \$600.

Solution:

In example 1 above, delete the amount rolled forward for interest carried forward for 2014.

In example 2 above, modify the amount rolled forward for interest carried forward for 2014. The amount to enter is \$600.

The roll forward problem of DT Max files will be corrected in *Personal Taxprep* 2015 v.4.0. The files rolled forward with this version will therefore not be affected by this problem. However, using version 4.0 to open a client file rolled forward with a prior version will not correct this problem. In this situation, manually modify the balance by subtracting from the balance of interest carried forward for 2014, the amount on line 323 of 2014.

Solution:

If you are preparing the return of a taxpayer who has no spouse and who is not self-employed, access the *Client Letter Worksheet* (Jump Code: **LW**), and modify the dates as follows, using overrides:

| | | | | |
|---------------------------------------|---|------------------------------|-------------|-------------|
| LW | City | Prov. / Terr. | Postal code | Amount paid |
| | | QC | | 0 00 |
| Taxation years and filing date | | | | |
| | Include instructions to mail by filing deadline | → 2016-05-02 | May 2, 2016 | |
| | Balance-due day | → 2016-05-02 | May 2, 2016 | |
| | Taxation years | 2014 2015 2016 2017 | | |

If you are preparing the return of a taxpayer and the return of the spouse and the taxpayer and/or the spouse are self-employed, only the balance due date should be modified, as follows, in the return of the taxpayer and the return of the spouse:

| | | | | |
|---------------------------------------|---|------------------------------|----------------|--|
| LW | | | | |
| Taxation years and filing date | | | | |
| | Include instructions to mail by filing deadline | 2016-04-30 | April 30, 2016 | |
| | Balance-due day | → 2016-05-02 | May 2, 2016 | |
| | Taxation years | 2014 2015 2016 2017 | | |

Note that this action must be done for each of the returns filed.
